

# THE FUELER 100™

*It's everything you demand from a heavy duty, high flow nozzle.*

M. Carder's high flow 1-1/2" inlet **automatic nozzle** is tough, reliable and yet easy to operate. Built for truck, bus, marine and off road equipment fueling as well as fuel oil delivery.

The high strength Tensalloy casting resists cracking. A common problem with other high flow nozzles.

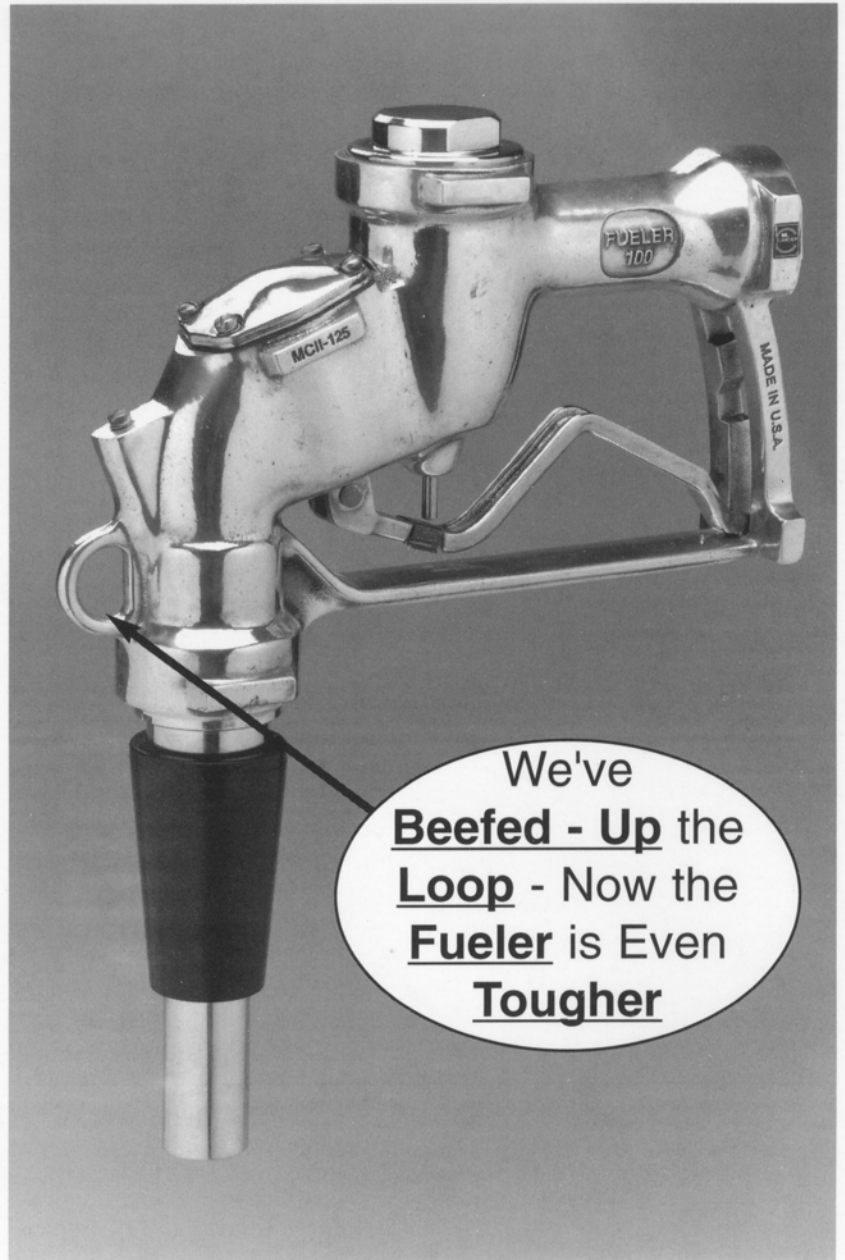

The **New 4-Hole Plunger** (Pat. Pend.) works with our patented Roto-O-Matic latch pin assembly to give **consistent automatic shut-off at low and high pressure operations**. You'll be impressed with how easy it is to operate. The longer barrel gives you more hand room and the curve of the lever has been raised for easier gripping. The end of the lever is precisely finished to slide smoothly into the hold-open notches in the handguard.

Replacing the spout assembly is easy. Just unscrew the retaining ring and pull out the spout assembly.

**ALL FUELER 100 NOZZLES ARE TESTED TO INSURE QUALITY AND PERFORMANCE.**

**YOU CAN EXPECT MORE...**

Shown with optional Spout Cone.

We've  
**Beefed - Up** the  
**Loop** - Now the  
**Fueler** is Even  
**Tougher**
